Professional Summary

Software Engineering graduate with experience since late 2022 in backend development, **REST microservices**, and enterprise integration. Specialized in **Spring Boot (Java 11/17/21)**, Apache Camel, **ETL** architecture, and migration of legacy systems, including MuleSoft and banking monoliths. Practical approach to **SOLID** and **EIP**, REST/SOAP/SFTP integration, automated testing (JUnit, Mockito, JaCoCo, JMX), CI/CD, and deployments with Docker/OpenShift/Azure/Kubernetes. Proficient in Agile (Scrum, Kanban) and API-first, MVC, and BFF architectures.

Key Achievements

- Reduced an Apache Camel report-generation process from **3 hours to 40 minutes** through refactoring and optimization.
- Migrated critical modules from monolith (JSF/EJB/Struts) to microservices with Spring Boot for banking clients.
- Led requirements gathering, documentation, and development of pending webservices-to-microservices migrations in the absence of supervisors.
- Provided technical support and audits to BCI bank teams, resolving escalated incidents.
- Co-designed and presented a modernization project for Santander's Web Toolkit tool.

Professional Experience

Aug 2026 – **Senior IT Consultant, Conkord**

- Present
- Design and develop solutions for the migration of legacy **MuleSoft** systems to **Java 21 microservices with Apache Camel** and an **ETL** architecture.
 - Implement Camel routes and **SFTP** flows using **Enterprise Integration Patterns (EIP)**; work with **Spring Boot and Maven** in a monolith organized into multiple modules.
 - Integrate **SOAP** services and **Oracle 12c EE through JPA**; develop SQL for a new tracing database and containerize applications with **Docker**.
 - Write unit tests with **JUnit and Mockito**, measure coverage with **JaCoCo**, run performance tests with **JMX** files, and create SOAP mocks with **Mockoon**.
 - Use **Claude Cowork agents** during development and work with **Scrum** and **CI/CD** workflows.

Feb 2026 – **Senior Software Engineer, TATA Consultancy Services, Remote**

- Aug 2026
- Worked as a Senior Java Engineer supporting Citi Bank's technology transformation; contributed to the modernization of a legacy J2EE project to **Spring Boot (Agile)**.
 - Led the migration of **NDM (Connect:Direct)** servers from on-premises infrastructure to **NDM Cloud**, using **uDeploy, TeamCity, and Git**; registered AutoSys jobs, conducted technical investigations, and provided infrastructure support to bank teams.
 - Supported the design and development of **RESTful APIs** on a microservices architecture, applying **SOLID**, design patterns (Singleton, Builder, BFF, Facade), and concurrency.
 - Integrated **Snyk** for vulnerability scanning; worked with UUID-based distributed tracing, **JPA/MongoDB** persistence, and event-driven messaging with **Kafka**.
 - Performed unit testing and coverage analysis with Mockito and JaCoCo; worked with Jira, Git, and CI/CD pipelines.

- Jan 2025 – **Software Engineer**, *Sentra Ltda.*, Santiago, Chile
- Feb 2026 ○ Outsourcing Senior backend developer for BCI Bank: migration of monolith to microservices with **Spring Boot 3 / Java 17**.
- REST API design (SOLID, SAGA pattern), Azure Service Bus and Feign Client for inter-service communication.
 - Deployment on Kubernetes/Azure with CI/CD (Gradle, Jenkins); performance and integration testing (JMX); Telepresence for local/pre-prod debugging.
 - Agile Scrum with Jira/Confluence.
- Jul 2023 – **Developer**, *LunaServicios Ltda.*, Santiago, Chile
- Jan 2025 ○ Outsourcing Santander bank Developer: Camel processes with EIP design pattern, creation of routes with **Apache Camel**, including unit testing (JUnit5, Mockito) for mass payment report generation — optimization using a dynamic creation-date filter in SFTP queries reduced execution time from **3 hours to 40 minutes**.
- ASP.NET with Sencha ExtJS migration to microservices architecture using Kafka, BFF, Angular, Apigee, Kaoto framework, and JSLT for dynamic JSONs.
 - Integration with Apigee and SOAP services; new Oracle PL/SQL stored procedures; report automation via Linux shells and SFTP.
 - Maintenance and new features in **.NET 4 (ASP.NET, C#)** and **ExtJS (Sencha)**; Opinator integration in Office Banking (Typescript Angular, IIS, Visual Studio).
 - Job scheduling with Control-M; Scrum with CI/CD (Jenkins, GitLab/GitFlow, SonarQube, OpenShift); design with Swagger, Draw.io, Miro.
- Dec 2022 – **Middleware / Junior Consultant**, *Invoke Ltda. (Red Hat project)*, Remote / Santiago
- May 2023 ○ Implementation of APIs and microservices for the PGU project using **Red Hat Fuse, OpenShift, and JBoss**, developed in Java 8 with Apache Camel XML.
- Technical documentation, functional/unit testing support, and audit requirements analysis.
 - Supported manual migration of an OpenShift 3 cluster to OpenShift 4 for IMSS México.
 - Worked on Linux VMs (RHEL, VMware, Horizon) under Agile methodology (Trello, Miro).

Education

- 2020 – 2023 **Computer Engineering**, *Duoc UC*, Santiago, Chile
- Data modeling, software architecture, project management, software quality, business intelligence, and requirements analysis.

Technical Skills

- | | |
|------------------------|---|
| Languages | Java 8/11/17/21, SQL/PL-SQL, TypeScript, JavaScript, C#, HTML5, CSS3 |
| Frameworks | Spring Boot 3, Apache Camel, Kafka, .NET (ASP.NET), Angular, React, Node.js/Nest.js, Django, Ionic |
| Architecture & Quality | Microservices, ETL, EIP, API-first, MVC, BFF, SAGA, SOLID, REST, Singleton, Builder, Facade |
| Databases | Oracle 12c EE, PostgreSQL, MySQL, SQLServer, MongoDB |
| Testing | JUnit 5, Mockito, JaCoCo, JMX, Mockoon, integration testing |
| DevOps & Cloud | GitHub/GitLab (GitFlow), Jenkins, SonarQube, Docker, uDeploy, TeamCity, OpenShift, Azure, Kubernetes, Telepresence, Control-M, LightSpeed |
| Security | JWT, OAuth2, Apigee, SSO, Snyk |
| Tools | Gradle, Maven (multi-module), Jira, Confluence, Trello, Swagger, Postman, Draw.io, Miro, DBever, Claude Cowork agents |
| OS | Linux (RHEL, Ubuntu, shell scripting), macOS, Windows |
| Other | Red Hat Fuse, JBoss, SFTP, SOAP, Sencha ExtJS, Bootstrap, VMware/Horizon, Service Now |

Languages
